16. Performance & Error Handling
17. Test Summary

## HOW TO USE THIS CHECKLIST

☐ Untested

✓ Pass — mark the Pass column

✗ Fail — mark the Fail column + add notes

### 1. Authentication & User Management

| Feature / Scenario          | Test Steps                                                                                              | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|-----------------------------|---------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Login – Valid               | 1. Open app<br>2. Enter valid email/password<br>3. Tap Login<br>4. Verify redirect to dashboard         | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Login – Invalid Credentials | 1. Enter wrong email/password<br>2. Verify error message appears<br>3. Verify no redirect occurs        | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Login – Empty Fields        | 1. Leave fields empty<br>2. Tap Login<br>3. Verify validation message                                   | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Registration                | 1. Navigate to Register<br>2. Fill all required fields<br>3. Submit<br>4. Verify account creation email | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Forgot Password             | 1. Tap "Forgot Password"<br>2. Enter registered email<br>3. Verify reset email sent                     | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Logout                      | 1. Tap Logout<br>2. Verify redirect to login<br>3. Verify session is cleared                            | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Session Persistence         | 1. Login<br>2. Close & reopen app<br>3. Verify still logged in                                          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Auto-logout on Token Expiry | 1. Login<br>2. Wait for token expiry<br>3. Perform action<br>4. Verify redirect to login                | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

### 2. Dashboard

| Feature / Scenario | Test Steps                                                                                       | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|--------------------|--------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Dashboard Load     | 1. Login<br>2. Verify dashboard displays<br>3. All sections visible (Tasks, Recent, Shortcuts)   | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| My Tasks Section   | 1. View tasks list<br>2. Scroll through items<br>3. Verify task details                          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Task Actions       | 1. Tap a task<br>2. Verify action modal opens<br>3. Complete task<br>4. Verify removed from list | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

| Feature / Scenario         | Test Steps                                                                                                                                                      | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Recent Assets              | 1. Check recent assets section<br>2. Verify asset cards<br>3. Tap asset → asset detail                                                                          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Actions – Search     | 1. Tap Search button<br>2. Verify navigation to search                                                                                                          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Actions – Certs      | 1. Tap Certs button<br>2. Verify navigation to certs screen                                                                                                     | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Actions – Activity   | 1. Tap Activity button<br>2. Verify navigation to activity log                                                                                                  | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Shortcuts Section          | 1. View shortcuts grid<br>2. Verify custom shortcuts display<br>3. Tap shortcut → action executes                                                               | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Add Shortcut               | 1. Tap "Add Shortcut"<br>2. Select shortcut type<br>3. Verify shortcut added to grid                                                                            | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Remove Shortcut            | 1. Tap "Manage Added"<br>2. Remove a shortcut<br>3. Verify removed                                                                                              | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Hire Dashboard (Web)       | 1. Log in on web<br>2. Navigate to Dashboard → Hire tab<br>3. Verify hire table displays<br>4. Verify all columns visible<br>5. Verify pagination controls work | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Dashboard Navigation (Web) | 1. Click navbar links<br>2. Verify navigation<br>3. Verify active state highlighting                                                                            | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

### 3. Search & Inventory

| Feature / Scenario            | Test Steps                                                                                                                        | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Search Input                  | 1. Enter search query<br>2. Verify results filter in real-time<br>3. Clear → all results shown                                    | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Filters – My Assets     | 1. Tap "My Assets"<br>2. Verify only user-assigned assets shown                                                                   | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Filters – Needs Service | 1. Tap "Needs Service"<br>2. Verify filtered results                                                                              | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Status Filter – On Hire       | 1. Open Filters<br>2. Select "On Hire" status chip<br>3. Verify only On Hire assets shown<br>4. Clear filter, verify all restored | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Advanced Filters              | 1. Open Filters modal<br>2. Select asset types<br>3. Select status<br>4. Apply filters<br>5. Verify results                       | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Clear Filters                 | 1. Apply filters<br>2. Tap "Clear All"                                                                                            | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

| Feature / Scenario     | Test Steps                                                                                                                                      | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
|                        | 3. Verify all filters reset                                                                                                                     |                          |                          |                |  |
| Sort Options           | 1. Select sort option<br>2. Verify results sorted<br>3. Change direction<br>4. Verify re-sorted                                                 | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Grid / Table Toggle    | 1. Switch between Grid and Table views<br>2. Verify both layouts display correctly                                                              | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Pagination             | 1. Navigate through pages<br>2. Change Rows per page (25/50/100/All)<br>3. Verify correct assets shown<br>4. Verify "1-25 of N" counter updates | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Asset ID Click (Table) | 1. Click Asset ID in table<br>2. Verify navigation to asset detail                                                                              | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Dynamic Columns        | 1. Filter by type with custom fields<br>2. Verify columns appear<br>3. Verify values correct                                                    | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 4. Asset Management

| Feature / Scenario     | Test Steps                                                                                                                                                                               | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Asset Detail View      | 1. Navigate to asset<br>2. Verify all fields display<br>3. Verify images load<br>4. Verify document list                                                                                 | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Edit Asset             | 1. Tap Edit<br>2. Modify fields<br>3. Save<br>4. Verify changes saved & in list                                                                                                          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Create New Asset       | 1. Tap "Create New Asset"<br>2. Fill required fields<br>3. Submit<br>4. Verify asset created                                                                                             | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Asset Status – On Hire | 1. Create a hire record for an asset<br>2. Navigate to that asset<br>3. Verify status badge shows "On Hire" (green)<br>4. Delete hire record<br>5. Verify status reverts to "In Service" | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Asset Status Change    | 1. Change asset status via dropdown<br>2. Verify status updates<br>3. Verify activity logged                                                                                             | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Assign Asset           | 1. Assign asset to user<br>2. Verify assignment saved<br>3. Verify appears in user assets                                                                                                | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Asset Images           | 1. Upload image<br>2. Verify displays<br>3. Verify thumbnail in list                                                                                                                     | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Asset Documents        | 1. Upload document<br>2. Verify appears<br>3. Tap View → document opens                                                                                                                  | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

| Feature / Scenario         | Test Steps                                                                                          | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|----------------------------|-----------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Additional / Custom Fields | 1. View additional fields<br>2. Verify custom fields display<br>3. Edit values<br>4. Verify saved   | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Service/Repair Reports     | 1. Sign off service/repair<br>2. Attach report<br>3. Verify in certs<br>4. Missing = "Not provided" | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Attach Report Later        | 1. View asset with missing report<br>2. Tap "Attach report"<br>3. Upload doc<br>4. Verify in certs  | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Back Navigation            | 1. Navigate to asset from search<br>2. Tap back<br>3. Verify returns to search                      | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 5. Asset Types

| Feature / Scenario         | Test Steps                                                                                                                                   | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Asset Type List            | 1. Navigate to Inventory<br>2. Tap Asset Types tab<br>3. Verify types listed with images                                                     | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Type Detail – Status Chips | 1. Tap an asset type<br>2. Verify status chips: In Service, On Hire, Repair, Maintenance, End of Life, Total<br>3. Verify counts are correct | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Asset Type Detail          | 1. Tap asset type<br>2. Verify details display<br>3. Verify custom fields listed                                                             | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Create Asset Type          | 1. Tap "Create New Asset Type"<br>2. Fill form<br>3. Add custom fields<br>4. Submit<br>5. Verify created                                     | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Edit Asset Type            | 1. Tap Edit<br>2. Modify fields<br>3. Add/remove custom fields<br>4. Save<br>5. Verify changes                                               | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Custom Fields              | 1. Add custom field<br>2. Set field type<br>3. Set required/optional<br>4. Verify in asset forms                                             | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Asset Type Image           | 1. Upload image<br>2. Verify in list<br>3. Verify in asset forms                                                                             | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 6. Equipment Hire ★ NEW

All features in this section were added after v1.0 (November 2024). DocuSign configuration is required for signing flows.

| Feature / Scenario                | Test Steps                                                                                                                                                                                                                                                                                                 | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Hire Dashboard – List (Web)       | 1. Open Dashboard → Hire tab on web<br>2. Verify hire records table loads<br>3. Verify columns: Asset, Serial, Type, Contact, Phone, Email, From, To, Status, Actions                                                                                                                                      | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Hire Dashboard – Pagination       | 1. If >25 records, verify pagination controls<br>2. Change rows per page (25/50/100/All)<br>3. Verify page navigation (prev/next) works<br>4. Verify "1-N of N" counter                                                                                                                                    | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Create New Hire (Web)             | 1. Tap "View hire form" on Hire dashboard<br>2. Fill: Hirer name, address, phone, email<br>3. Set hire start/end dates<br>4. Add equipment item (search or enter asset ID)<br>5. Submit<br>6. Verify new hire appears in list<br>7. Verify asset status changes to "On Hire"                               | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Create Hire from QR Scan (Mobile) | 1. Scan asset QR code on iOS/Android<br>2. Select "Hire" from action options<br>3. Verify form opens with asset ID & description pre-populated<br>4. Fill hirer details<br>5. Submit<br>6. Verify hire created<br>7. Verify asset status = On Hire                                                         | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Generate PDF & Sign (DocuSign)    | 1. Open a hire record → Edit<br>2. Tap "Generate PDF & Sign"<br>3. Verify DocuSign signing tab opens in browser<br>4. Complete signature in DocuSign<br>5. Verify signing tab closes automatically<br>6. Verify hire list refreshes<br>7. Verify status changes to "Signed"<br>8. Verify signed PDF stored | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Send Hire via Email (DocuSign)    | 1. Open a hire record → Edit<br>2. Tap "Send via Email"<br>3. Verify email sent to hirer<br>4. Hirer signs via email link<br>5. Verify webhook updates status to "Signed"                                                                                                                                  | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Hire Status – Signed Badge        | 1. After signing, verify hire row shows green "Signed" badge<br>2. Verify "Pending signature" shown for unsigned hires<br>3. Verify badge colour: green=Signed, amber=Pending                                                                                                                              | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| View Signed Document              | 1. On signed hire, tap View icon<br>2. Verify signed PDF opens in new tab (not Word doc)<br>3. Verify DocuSign signature appears in PDF                                                                                                                                                                    | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Download Document                 | 1. Tap Download icon on a hire row<br>2. If signed: verify signed PDF downloaded<br>3. If not signed: verify Word docx downloaded                                                                                                                                                                          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Tooltip on Action Icons           | 1. Hover over each action icon in hire table<br>2. Verify tooltip label appears near icon<br>3. Verify tooltip disappears on mouse out                                                                                                                                                                     | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Edit Hire Record                  | 1. Tap Edit icon on a hire row<br>2. Verify form loads with existing data<br>3. Modify fields<br>4. Save<br>5. Verify changes saved in list                                                                                                                                                                | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

| Feature / Scenario              | Test Steps                                                                                                                                                                                                                                  | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Copy Hire Record                | 1. Tap Copy icon on a hire row<br>2. Verify new form pre-filled with copied data<br>3. Submit<br>4. Verify new hire created                                                                                                                 | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Delete Hire Record              | 1. Tap Delete icon on a hire row<br>2. Verify confirmation modal appears<br>3. Confirm delete<br>4. Verify hire removed from list<br>5. Verify asset status reverts to "In Service"                                                         | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Post-Sign Redirect & Highlight  | 1. Submit hire form (Send or Sign)<br>2. Verify form closes and redirects to hire list<br>3. Verify newly created hire row is highlighted briefly                                                                                           | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Hire Cards – Mobile (Other Tab) | 1. Open app on iOS/Android<br>2. Tap "Other" tab<br>3. Tap "Hire" sub-tab<br>4. Verify hire records display as cards<br>5. Verify each card shows: equipment, contact, dates, status badge<br>6. Verify "Signed" = green, "Pending" = amber | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 7. Certificates / Documents

| Feature / Scenario            | Test Steps                                                                                                            | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Certs List View               | 1. Navigate to Certs<br>2. Verify documents listed<br>3. Verify table layout with sticky pagination                   | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Certs Pagination              | 1. Verify pagination bar sticks at bottom<br>2. Change rows per page<br>3. Navigate pages<br>4. Verify counts correct | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Filters – My Documents  | 1. Tap "My Documents"<br>2. Verify only user's assets shown                                                           | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Filters – Expiring Soon | 1. Tap "Expiring Soon"<br>2. Verify filtered results<br>3. Verify dates correct                                       | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Filters – Expired       | 1. Tap "Expired"<br>2. Verify expired docs shown                                                                      | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Open Document                 | 1. Tap "Open" on doc<br>2. Verify opens<br>3. Verify correct file                                                     | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Edit Document                 | 1. Tap "Edit"<br>2. Modify details<br>3. Save<br>4. Verify changes                                                    | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Document Sorting              | 1. Change sort option<br>2. Verify re-sorted                                                                          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Service/Repair Reports        | 1. Verify reports appear in certs<br>2. Missing = "Not provided"                                                      | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 8. Activity Log

| Feature / Scenario  | Test Steps                                                                    | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|---------------------|-------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Activity List       | 1. Navigate to Activity<br>2. Verify activities listed chronologically        | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Activity Details    | 1. View activity entry<br>2. Verify user info, asset info, details shown      | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Activity Filtering  | 1. Filter by type<br>2. Verify filtered<br>3. Filter by user<br>4. Verify     | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Activity Navigation | 1. Tap asset link<br>2. Verify navigates to asset<br>3. Back navigation works | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 9. QR Code Features

| Feature / Scenario  | Test Steps                                                                                                                                    | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| QR Scanner          | 1. Open QR scanner<br>2. Grant camera permission<br>3. Scan QR code<br>4. Verify asset detected                                               | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| QR Check-in         | 1. Scan QR code<br>2. Verify check-in page opens<br>3. Complete check-in<br>4. Verify activity logged                                         | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| QR → Hire (Mobile)  | 1. Scan asset QR<br>2. Tap "Hire"<br>3. Verify hire form opens with asset pre-populated<br>4. Complete hire<br>5. Verify asset On Hire status | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| QR Code Display     | 1. View asset<br>2. Verify QR code displays<br>3. Verify correct data encoded                                                                 | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| QR Sheet Generation | 1. Admin: Generate QR sheet<br>2. Verify PDF generated<br>3. Verify QR codes correct                                                          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Location Capture    | 1. Scan QR with location permission<br>2. Verify location captured<br>3. Verify saved to asset                                                | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 10. Quick Actions & Shortcuts

| Feature / Scenario | Test Steps                                                                                                                      | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Quick View         | 1. Select Quick View shortcut<br>2. Scan asset<br>3. Verify asset detail opens                                                  | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Transfer     | 1. Select Quick Transfer<br>2. Scan asset<br>3. Select recipient<br>4. Verify transfer completes<br>5. Verify location captured | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

| Feature / Scenario | Test Steps                                                                                                                           | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Transfer-To Me     | 1. Select Transfer-To Me<br>2. Scan asset<br>3. Verify assigned to self                                                              | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Service      | 1. Select Quick Service<br>2. Scan asset<br>3. Fill form<br>4. Submit<br>5. Verify logged & status updated                           | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Quick Repair       | 1. Select Quick Repair<br>2. Scan asset<br>3. Fill form<br>4. Submit<br>5. Verify logged & status updated                            | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Service Sign-off   | 1. Open pending service task<br>2. Fill sign-off form<br>3. Attach report (optional)<br>4. Sign off<br>5. Verify status "In Service" | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Repair Sign-off    | 1. Open pending repair task<br>2. Fill sign-off form<br>3. Sign off<br>4. Verify status "In Service"                                 | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 11. Admin Features

| Feature / Scenario | Test Steps                                                                                    | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|--------------------|-----------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Admin Access       | 1. Login as admin<br>2. Verify admin features visible                                         | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Generate QR Sheet  | 1. Tap Generate QR Sheet<br>2. Enter number of sheets<br>3. Generate<br>4. Verify PDF created | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| User Management    | 1. Navigate to Admin<br>2. View users list<br>3. Verify user details & actions                | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Domain Management  | 1. Access domain management<br>2. Verify domains listed<br>3. Test domain operations          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Reset Password     | 1. Select user<br>2. Reset password<br>3. Verify reset email sent                             | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 12. "Other" Tab ★ NEW

The Tasks tab was renamed to "Other" and now contains two sub-tabs: Tasks and Hire.

| Feature / Scenario | Test Steps                                                                                                                                                       | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| "Other" Tab        | 1. Open app on iOS/Android<br>2. Verify bottom tab now labelled "Other" (was "Tasks")<br>3. Tap "Other" tab<br>4. Verify sub-tabs "Tasks" and "Hire" are visible | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

| Feature / Scenario         | Test Steps                                                                                                                                                                                  | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Tasks Sub-tab              | 1. Tap "Tasks" sub-tab<br>2. Verify existing tasks display as before<br>3. Task count badge on tab icon visible                                                                             | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Hire Sub-tab – Card View   | 1. Tap "Hire" sub-tab<br>2. Verify hire records load as cards<br>3. Each card: equipment name/serial, contact, phone, email, date range, status badge<br>4. Signed = green, Pending = amber | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Hire Sub-tab – Empty State | 1. With no hires, open Hire sub-tab<br>2. Verify empty state message displayed                                                                                                              | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Task Count Badge           | 1. Verify "Other" tab shows badge count when tasks exist<br>2. Badge shows number or "99+" for large counts<br>3. Badge clears when tasks are completed                                     | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 13. UI Components & Consistency ★ NEW

Reusable components ensuring visual consistency across the app.

| Feature / Scenario           | Test Steps                                                                                                                                                                                                       | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Status Badge – On Hire       | 1. Find asset with "On Hire" status<br>2. Verify green teal badge with assignment icon<br>3. Verify consistent across Inventory, Search, Asset Detail, Type Detail                                               | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Status Badge – All Types     | 1. Verify In Service (blue), Repair (orange), Maintenance (yellow), End of Life (purple), On Hire (green)<br>2. Verify consistent across all screens                                                             | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Table Icon Buttons           | 1. Verify action buttons use consistent coloured icons<br>2. View=purple, Download=blue, Edit=amber, Delete=red, Copy=teal, Send=sky blue<br>3. Verify hover tooltips appear on web                              | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Confirm Delete Modal         | 1. Trigger delete on any record<br>2. Verify custom modal (not browser alert)<br>3. Verify Cancel and Confirm buttons styled correctly                                                                           | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Empty State Component        | 1. Navigate to a section with no data<br>2. Verify consistent empty state icon + message                                                                                                                         | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Loading Spinner              | 1. Trigger data load<br>2. Verify consistent loading spinner across all screens                                                                                                                                  | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Form Buttons (Submit/Cancel) | 1. Open any form<br>2. Verify Submit button is primary blue, Cancel is outlined<br>3. Verify consistent across all forms                                                                                         | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| TablePagination Component    | 1. Verify pagination bar in Hire, Certs, and Inventory<br>2. Rows per page: 25/50/100/All tabs<br>3. "1-N of N / Page X of Y" display<br>4. Prev/Next navigation buttons<br>5. Sticks to bottom on all platforms | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 14. Mobile-Specific Features

| Feature / Scenario    | Test Steps                                  | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|-----------------------|---------------------------------------------|--------------------------|--------------------------|----------------|--|
| Bottom Tab Navigation | 1. Verify tabs: Dashboard, Inventory, Other | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

| Feature / Scenario     | Test Steps                                                                                                                                      | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
|                        | 2. Switch between tabs<br>3. Verify navigation works                                                                                            |                          |                          |                |  |
| Mobile Layout – Search | 1. Open search on mobile<br>2. Verify card layout<br>3. Verify responsive design<br>4. Verify filters accessible                                | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Mobile Layout – Certs  | 1. Open certs on mobile<br>2. Verify card layout<br>3. Verify filters work                                                                      | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Hire Form – Mobile     | 1. Open hire form on mobile<br>2. Verify all fields accessible<br>3. Verify keyboard handling<br>4. Date pickers work<br>5. Signature pad works | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Screen Header          | 1. Verify header displays<br>2. Verify back button works<br>3. Verify title centred<br>4. Verify navigation consistent                          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Touch Interactions     | 1. Test all touch targets<br>2. Verify adequate size<br>3. Verify feedback on tap                                                               | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Camera Permissions     | 1. Request camera access<br>2. Verify permission prompt<br>3. Grant/deny<br>4. Verify behavior                                                  | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Location Permissions   | 1. Request location access<br>2. Grant/deny<br>3. Verify behavior                                                                               | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 15. Web-Specific Features

| Feature / Scenario   | Test Steps                                                                                                                                                       | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Web Navbar           | 1. Verify navbar displays<br>2. Verify all links: Dashboard, Inventory, Search, Activity, Certs, Hire<br>3. Verify active state highlighting                     | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Hire Table Layout    | 1. Verify hire table columns fit on screen<br>2. Verify column spacing (no excessive gaps)<br>3. Verify horizontal scroll only when needed                       | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Table Tooltip (Web)  | 1. Hover over action icons in any table<br>2. Verify tooltip appears below icon<br>3. Verify tooltip has correct label<br>4. Verify no overlap with table header | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Grid/Table Toggle    | 1. Switch between views<br>2. Verify both work<br>3. Verify state persists                                                                                       | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Responsive Design    | 1. Resize browser window<br>2. Verify layout adapts<br>3. Verify no unexpected scroll                                                                            | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| DocuSign Return Flow | 1. Complete DocuSign signing in new tab                                                                                                                          | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

| Feature / Scenario | Test Steps                                                                                                                        | ✓ Pass | ✗ Fail | Notes / Issues |  |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------|--------|--------|----------------|--|
|                    | 2. Verify signing tab closes automatically<br>3. Verify parent tab hire list refreshes<br>4. Verify signed row highlights briefly |        |        |                |  |

## 16. Performance & Error Handling

| Feature / Scenario      | Test Steps                                                                                                                                               | ✓ Pass                   | ✗ Fail                   | Notes / Issues |  |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|--------------------------|----------------|--|
| Loading States          | 1. Perform slow operations<br>2. Verify loading indicators<br>3. Verify user feedback                                                                    | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Error Messages          | 1. Trigger errors<br>2. Verify error messages display<br>3. Verify helpful messages<br>4. Verify recovery options                                        | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Network Errors          | 1. Disconnect network<br>2. Perform actions<br>3. Verify error handling<br>4. Verify retry options                                                       | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Large Data Sets         | 1. Load large asset list<br>2. Verify performance<br>3. Verify pagination works<br>4. Verify no crashes                                                  | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| Form Validation         | 1. Submit invalid forms<br>2. Verify validation messages<br>3. Prevents submission<br>4. Helpful hints                                                   | <input type="checkbox"/> | <input type="checkbox"/> |                |  |
| DocuSign Error Handling | 1. Simulate DocuSign unavailable<br>2. Verify informative error message<br>3. Verify no crash<br>4. Verify fallback (e.g. Word doc download still works) | <input type="checkbox"/> | <input type="checkbox"/> |                |  |

## 17. Test Summary

| Section                          | Total | Passed | Failed | Notes |
|----------------------------------|-------|--------|--------|-------|
| Authentication & User Management |       |        |        |       |
| Dashboard                        |       |        |        |       |
| Search & Inventory               |       |        |        |       |
| Asset Management                 |       |        |        |       |
| Asset Types                      |       |        |        |       |
| Equipment Hire ★ NEW             |       |        |        |       |
| Certificates / Documents         |       |        |        |       |
| Activity Log                     |       |        |        |       |
| QR Code Features                 |       |        |        |       |
| Quick Actions & Shortcuts        |       |        |        |       |
| Admin Features                   |       |        |        |       |

| Section                      | Total | Passed | Failed | Notes |
|------------------------------|-------|--------|--------|-------|
| "Other" Tab ★ NEW            |       |        |        |       |
| UI Components ★ NEW          |       |        |        |       |
| Mobile-Specific              |       |        |        |       |
| Web-Specific                 |       |        |        |       |
| Performance & Error Handling |       |        |        |       |
| TOTAL                        |       |        |        |       |
